Operating temperature: -40°C~145°C

Pack Contents:
1 x Rock light
1 x Standard base with stainless bolts, lock nuts and washers
1 x User guide

Mounting and Installation:
The most common areas to install Oricom Rock Lights, include; Sides of vehicle, under sills, front and rear corners, underneath trays, inside boot or bonnet compartment, roof racks etc.

Once you have established where the rock lights are to be installed, secure them in place, then secure the wires, and connect the red power input wire to the positive battery/power terminal. Connect the black ground wire to the negative battery terminal or a factory grounding point. If you choose to use a switch you will need to route the wiring via the switch before connecting to power.
