An innovative wearable product designed to help parents monitor their baby's wellness and sleep quality. The device's soft fabric strap is adjustable to ensure a comfortable and secure fit onto the child's ankle, and the precise sensor on the underside of the monitor takes immediate readings. Find true peace of mind, as you easily understand how well your baby has slept through the long nights, by looking at the data and sleep quality report generated in the HubbleClub for Partners App, available for free download.
